

## First Announcement:

# COVID-19 pandemic and how we deal with data

**Tuesday, July 27, 2021, 14-16.30 pm CET**

This seminar will deal with data aspects of the COVID-19 pandemic situation and how it impacts on what we know about the pandemic. After nearly 1.5 years of the pandemic, there is still high uncertainty in many aspects of what we know about Covid-19 and its associated risks. This may be due to the way we sample and use information to extract information on the pandemic- This seminar will highlight some areas of this and discuss its impact on what we know and how we could do a better a job in the future.

Organizing committee:

Achim Güttner, Novartis, Lilla DiScala, J&J, Amanda Ross, Swiss Tropical and Public Health Institute, Marcel Wolbers, Roche, Sigrid Behr, Novartis and Hans Ulrich Burger, Roche

## Program

<b>14:00-14:05</b>	<b>Welcome</b> Hans Ulrich Burger, BBS president Amanda Ross, Swiss Tropical and Public Health Institute, Basel
